Jim,

It has been a pleasure working with you and everyone from Woodrow who I have met or spoken to. The entire process from start to finish was relatively seamless. I believe that the communication between Woodrow and Pulte made this possible. Woodrow has been very open and fair with the contract and any of the change orders that were written. Being able to discuss the job and schedule on a daily basis made the build out a success.

Larry Mau was excellent, especially with putting up with me!! We spoke daily either at the site or by phone. He committed to a schedule in the beginning, and believed in it through the entire process. Larry was always professional with the trades and building management. Larry was always planning ahead and keeping the completion date in mind. All change orders were handled in stride and never affected the schedule, even if it was a late change. Larry's follow up has been excellent, including the punch list items. He always holds the trades accountable for their work. It was a pleasure working with Larry and it is kind of sad that the build out is complete and we will be moving on!!

I would highly recommend Woodrow to anyone looking to build out new space. The trade base that Woodrow used for our job was great. They were very professional and respected each other's work. They were friendly and courteous not only to each other but also to Pulte employees and the building management.

Again, thank you for not just fulfilling the contract, but for giving Pulte a great new office with a fresh start!!
