

To Whom It May Concern

Our company Royal Cyber has just completed a major construction project doubling our corporate headquarters in Naperville, IL and updating our existing space to 7,136 square feet. Woodrow Development was the chosen contractor on this project and it was a pleasant experience working with them. Their team did a great job keeping us informed during the entire project. Their Project Manager, David, was very helpful in making sure that the selections were correct before installation and keeping us updated on the schedule on a weekly basis. David also worked with our IT vendor and the Furniture vendor to insure everything went smoothly. We are extremely happy with the quality of the work and the attention that Woodrow Development gave us during this project. I would highly recommend them for any construction project you may have.
